#### **Ecommerce site**

- Clone and existing website including the shopping cart and check out. The site uses Ecwid and Stripe.
- Migrate to a AWS server
- The Video Background needs to be changed. See sample of video under consideration.
- Change the header and pictures on home page, I will provide Adobe illustrator File.
- Below is a rough mockup of the current Home Page.
- The graphics overlaid on the video are too large and out of proportion
- Most of the pictures on the home page are too large and they need to resized
- If the best option is Word Press, I will need to buy a new license but will need the name of the template to buy.
- I do not have a budget for this project.

### Current Home Page
